ICPC2T 2027

2027 IEEE International Conference on

Power, Control and Computing Technologies (ICPC2T 2027)

NIT Raipur, Chhattisgarh, India | 3–5 March 2027

SPECIAL SESSION (SS2) ON

Energy-Efficient AI, Intelligent Control, and Edge Computing for Sustainable Power and Smart Energy Systems

LIST OF TOPICS

- Energy-efficient artificial intelligence and Green AI
- Lightweight machine learning, deep learning, and TinyML
- Intelligent, adaptive, robust, and predictive control
- Reinforcement learning for power and energy-system control
- Edge, fog, and cloud intelligence for smart-energy systems
- Smart grids, microgrids, and distributed energy resources
- Renewable-energy forecasting, integration, and optimization
- Energy-storage and battery-management systems
- Electric vehicles, smart charging, and vehicle-to-grid technologies
- Demand response, load forecasting, and intelligent energy management
- AI-based fault diagnosis, protection, and predictive maintenance
- Digital twins and AIoT-enabled cyber-physical energy systems
- Federated, distributed, and privacy-preserving learning
- Cybersecurity, explainable AI, and trustworthy energy intelligence
- Power electronics, intelligent converters, and real-time hardware validation

ORGANIZING CHAIRS

Arti Ranjan
Niels Brock Copenhagen Business College (NBCBC), Copenhagen, Denmark

Dr. Rajiv Kumar Nath
SSCSE, Sharda University, Greater Noida

Dr. Preeti Yadav
MJP Rohilkhand University, Bareilly

Dr. Kanika Singhal
Noida Institute of Engineering and Technology, Greater Noida

SUBMISSION DETAILS

Submit here https://cmt3.research.microsoft.com/User/Login?ReturnUrl=%2FICPCCT2027

After login, select Special Session (**SS2**): "Energy-Efficient AI, Intelligent Control, and Edge Computing for Sustainable Power and Smart Energy Systems"
